System Engineer 8 v1.0.9.0
Release Date: February 4, 2025

Overview

This release focuses on enhancing stability, improving UI/UX, and addressing bugs. Key updates include performance improvements and the addition of EQ and Crossover thumbnails.

Enhancements:

IP Address Padding – Added a pad function to ensure IP address arrays are always 4 bytes long.

EQ Thumbnail– Implemented EQ thumbnail rendering.

Bug Fixes:

Legalised File Names – Ensured file names comply with legal naming conventions.

Language Conversion Fix – Resolved an issue affecting conversions in foreign languages.

OEM Component Name Updates – Applied updates to OEM component names.

DSP Input Names – Fixed a bug where DSP input names were being overwritten buy the device after being loaded.
